

## VRB SERIES

A valuable alternative for applications requiring high positional accuracy and dynamic performance. The VRB is a <math>< 3</math> arc-min gearbox that offers a through hole mounting design, making it easier to assemble onto various equipment. This product is an ideal fit for various belt drive and actuator applications found throughout the packaging and assembly cell automation markets.

Various standard wash down and food grade options are available, making the VRB an attractive choice for the toughest environments. We offer the broadest selection of frame sizes and ratios, with immediate availability on most configurations. Industry standard mounting dimensions allow the VRB to be employed in legacy equipment designs, saving our customers time and money.

## VRB SERIES

- Exceptional value for high end motion control applications with demanding accuracy requirements
- The widest range of frame sizes and ratios available in the market
- Best-In-class backlash ( $\leq 3$  arc-min)
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard through-bolt mounting style
- Assembled in the USA, with immediate delivery

# VRB SERIES Inline Planetary

## VRB Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation. 40% higher tooth surface area than the industry standard
- ② One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ③ Uncaged needle roller bearings provide excellent torque density and torsional rigidity. 43% larger bearing surface area compared to the rest of the industry
- ④ Unique labyrinth input seal design greatly reduces heat and increases system efficiency. IP65 protection is available for wash down applications
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

## VRB Series Model Code

VRB

\*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearhead selection tool.

\*1) At nominal input speed, service life is 20,000 hours

\*2) The maximum torque when starting or stopping operation

\*3) The maximum torque allowed under a stress situation (Permitted 1,000 times during service life)

\*4) The average input speed

\*5) The maximum intermittent input speed

\*6) Torque at no load applied to the input shaft at nominal input speed

\*7) At this load and nominal input speed, service life will be 20,000 hours. (The radial load applied to the output side shaft center)

\*8) At this load and nominal input speed, service life will be 20,000 hours. (The axial load applied to the output side bearing)

\*9) The maximum radial load that the gearbox can accept

\*10) The maximum axial load that the gearbox can accept

\*11) The efficiency at the nominal output torque rating

\*12) This does not include lost motion

\*13) Contact NIDEC-SHIMPO for the testing conditions and environment

\*14) IP65 (wash-down) is available as an option. Contact NIDEC-SHIMPO for more details

\*15) The weight may vary slightly between models

- \*9) The maximum radial load that the gearbox can accept
- \*10) The maximum axial load that the gearbox can accept
- \*11) The efficiency at the nominal output torque rating
- \*12) This does not include lost motion
- \*13) Contact NIDEC-SHIMPO for the testing conditions and environment
- \*14) IP65 (wash-down) is available as an option. Contact NIDEC-SHIMPO for more details
- \*15) The weight may vary slightly between models

# VRB SERIES Inline Planetary

## VRB 180 1-Stage Dimensions

Input bore size  $\leq \varnothing 38$  mm

Input bore size  $\leq \varnothing 48$  mm

Input bore size  $\leq \varnothing 65$  mm

Keyed shaft

Smooth shaft

\*1) Length will vary depending on motor

\*2) Bushing will be inserted to adapt to motor shaft

## VRB 180 2-Stage Dimensions

Input bore size  $\geq \varnothing 28$  mm

Input bore size  $\geq \varnothing 38$  mm

Input bore size  $\geq \varnothing 48$  mm

- \*1) Length will vary depending on motor
- \*2) Bushing will be inserted to adapt to motor shaft

\*1) At nominal input speed, service life is 20,000 hours

\*2) The maximum torque when starting or stopping operation

\*3) The maximum torque allowed under a stress situation (Permitted 1,000 times during service life)

\*4) The average input speed

\*5) The maximum intermittent input speed

\*6) Torque at no load applied to the input shaft at nominal input speed

\*7) At this load and nominal input speed, service life will be 20,000 hours. (The radial load applied to the output side shaft center)

\*8) At this load and nominal input speed, service life will be 20,000 hours. (The axial load applied to the output side bearing)

\*9) The maximum radial load that the gearbox can accept

\*10) The maximum axial load that the gearbox can accept

\*11) The efficiency at the nominal output torque rating

\*12) This does not include lost motion

\*13) Contact NIDEC-SHIMPO for the testing conditions and environment

\*14) IP65 (wash-down) is available as an option. Contact NIDEC-SHIMPO for more details

\*15) The weight may vary slightly between models
